

HESHANI WICKRAMASINGHE

Full-Stack Developer | MERN Stack | Android (Kotlin) | Information Technology Undergraduate

Malabe, Sri Lanka | +94 769 304 405 | Email | Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Information Technology undergraduate at SLIIT specializing in full-stack web and mobile application development with hands-on experience in the MERN stack (MongoDB, Express.js, React, Node.js), Kotlin-based Android development, and Spring Boot REST APIs. Proven ability to design and deliver multi-module applications with real-world functionality including authentication, real-time features, and role-based access control. Collaborative team player with a user-centered mindset, seeking a software engineering internship to contribute meaningfully while developing professional expertise.

TECHNICAL SKILLS

Languages: Java | Kotlin | JavaScript | Python | C | C++

Frontend: React.js | HTML5 | CSS3

Backend: Node.js | Express.js | Spring Boot | REST API | JWT Authentication | Google OAuth 2.0

Mobile: Android Development (Kotlin) | MVVM Architecture | Android Jetpack

Databases: MongoDB | MySQL

Cloud & DevOps: Git | GitHub | Docker (Basics)

UI/UX: Figma | Wireframing

Testing & Tools: Postman | Playwright | MongoDB | VS Code | Android Studio | IntelliJ IDEA

Concepts: OOP | MVC | MVVM | Agile/Scrum

PROJECTS

SmartCampus – University Community Platform

Group Project | Spring Boot REST API, React 19, MongoDB, JWT Authentication | [GitHub Repository](#) 2026

Built a centralized web platform for campus resource management featuring facility booking with conflict detection and maintenance ticket tracking with technician assignment.

My Contribution (Booking Management):

- Developed a full-stack Incident Management System using React.js, Spring Boot, MongoDB, REST APIs, and JWT Authentication.
- Developed a Booking Management System enabling resource reservations with conflict detection, approval workflows, and role-based booking visibility for users and admins.
- Designed RESTful API architecture with Spring Boot backend and React 19 frontend following MVC principles.

Uni-Connect – Smart Campus Resource Management Platform

Group Project | MongoDB, Express.js, React, Node.js (MERN Stack), JWT Authentication | [GitHub Repository](#) 2026

Developed an integrated university community platform with modules for lost & found services, kuppi (peer tutoring) session management, and payment engagement features.

My Contribution (Lost & Found Module)

- Developed a MERN Stack-based report a lost item, register a found item, direct chat between students, secure item handover, and verification.
- Implemented CRUD operations, form validation, and centralized data management using MongoDB.
- Built responsive React.js interfaces and integrated RESTful APIs for seamless frontend-backend communication.
- Enhanced service management workflows through real-time status updates, Agile collaboration, and version control using Git and GitHub.

Smart Alert – School Management System

Group Project | Express.js, React, Node.js (MERN Stack), MongoDB, JWT Authentication | [GitHub Repository](#) 2025

Developed a full-stack school management platform digitizing attendance tracking, transport management, exam management, and notice distribution.

My Contribution (Examination Management):

- Developed a MERN Stack-based Examination Management System with the ability to manage exam settings, grading schemes, and seating arrangements. download report cards (PDF), download hall arrangement and sheet arrangement (PDF), automated performance analysis and grading, role-based access for exam data, and progress analysis report.
- Integrated REST APIs, backend services, and live update mechanisms to improve communication between administrators, drivers, students, and parents.
- Built responsive and user-friendly interfaces using modern UI/UX principles to enhance accessibility and user experience.
- Collaborated in an Agile development environment using Git and GitHub for version control and team collaboration.
-

Nuvio – Android Wellness & Habit Tracking Application

Individual Project | Android Studio, Room Database, MVVM Architecture | [GitHub Repository](#) 2025

- Built a productivity app with task creation, categorization, and deadline tracking using local data persistence via Room Database.
- Followed MVVM architecture and Android Jetpack components; designed intuitive UI with RecyclerView, CardView, and Material Design.

EDUCATION

B.Sc. (Hons) in Information Technology

2023 – Present

Sri Lanka Institute of Information Technology (SLIIT) | Specialization: Information Technology

CERTIFICATIONS

MongoDB Atlas Administrator Path

2026

MongoDB – Official Certification

- Completed modules: Atlas Foundations & Security, Replication, Atlas Administration, Logging, Metrics & Monitoring, Backup & Recovery, Upgrades & Maintenance.

Python for Beginners – Certificate

2026

- *University of Moratuwa (Open UOM)*

LEADERSHIP & EXTRACURRICULAR

- **Group Project Lead, SLIIT:** Led team development across multiple academic projects, coordinating task allocation, timelines, and code integration.
- **Active contributor:** collaborative software projects applying Agile/Scrum methodology throughout the SDLC.

LANGUAGES

English: Professional Working Proficiency | Sinhala: Native Proficiency
